Intellidyne to enter China marketplace through HuaYang Technology and Trade Group Corp. partnership

Glen Cove, NY—Intellidyne, LLC, has entered into an agreement with China HuaYang Technology and Trade Group Corp. in which the Asian firm will become its exclusive importer and distributor of *IntelliCon* energy-saving controls. The firm will serve the massive market of the People's Republic of China. This move brings the advantages of energy-saving and pollution-reduction technologies to this burgeoning marketplace through the import of microprocessor-controlled heating, ventilation, air conditioning and refrigeration systems.

Liu Jiuguang, president of China HuaYang, says, "We are faced with challenges and opportunities in this new century. This partnership with Intellidyne will contribute greatly to HuaYang's mission to bring new technologies to expanding economic markets through the development of environmental protection capabilities and computerized control breakthroughs. At the same time, it will help both our countries foster international economic cooperation."

Mike Ruff, chief operating officer of Intellidyne, says, "China is a very attractive market with significant potential for the Intellidyne controls. We are extremely excited to have a strategic partner like China HuaYang Technology and Trade Group Corp. to represent us in China."

Through the use of Intellidyne's energy-saving products, clients in China can enjoy the advantages and comforts offered by modern HVAC systems while limiting its use of resources and the effects of these technologies on the planet.

About HuaYang Technology and Trade Group Corp.: HuaYang Corporation, established in 1984, is the first state-owned enterprise to engage in the introduction of technology from abroad, and it is involved in an extensive network of international economic cooperation initiatives. The corporation has organized several specialized subsidiaries and joint ventures, and has an interest in pursuing products and services to promote environmental protection goals.

About Intellidyne: Intellidyne, LLC is the market-leading developer and manufacturer of energy savings controls for commercial and residential heating, air conditioning and refrigeration applications that immediately reduce energy consumption by at least 10%. Intellidyne, founded in 1996, is privately held and located in Glen Cove, Long Island, New York. Already installed in thousands of government, commercial and residential buildings, their patented, proprietary, microprocessor-based product line is measurably reducing energy consumption, energy costs and pollution throughout the country. Intellidyne, LLC may be found on the web at www.intellidynellc.com.
