Intellidyne makes Greening Levittown a big success

Citizens see proven energy savings with Intellidyne economizers

Glen Cove, NY (February 25, 2008) – It's working! The Intellidyne *IntelliCon*[®]-HW+ Hot Water Heating System Fuel Economizers are making a great success out of Levittown's—the famed New York suburb—initiative to go green as a way of celebrating its 60th birthday.

Intellidyne contributed by installing—for free—its *IntelliCon*-HW+ Hot Water Heating System Fuel Economizers in 50 Levittown homes. It also offers all other families in the town discounts on the microprocessor-control devices. This is important in a town in which many of the boilers are original from when the homes were built in 1947. Installation of the *IntelliCon*-HW+ economizers began on January 3, 2008, and 53 residents have already taken advantage of the opportunity to increase their boilers' efficiency and decrease their energy consumption and costs.

And that is exactly what's happening, with homeowners already seeing proven reductions on their fuel usage. One Wantagh Avenue family had an average savings of 6.8 %, or approximately 57 gallons of fuel saved, and a Loring Road home benefited with a savings of 14.9%, or approximately 60 gallons of fuel. According to Mike Ruff, chief operating officer of Intellidyne, "For the average home, that works out to be between \$350 and \$400 in savings annually, as well as a reduction of carbon dioxide and particulate emissions into the environment." Not only that, the Levittown families are assured these advantages with no sacrifice of comfort.

The *IntelliCon*-HW+ reduces energy consumption by dynamically adjusting the burner run pattern to match the system's "heat load" of hot water heating systems, thanks to state-of-the-art microprocessor-based dynamic management. An illuminated LCD display shows runtime savings, and payback is typically 1 to 2 heating seasons.

Intellidyne economizers have an outstanding record of energy saving, with a typical reduction of 10% to 20% in energy use. A study by the New York State Energy Research and Development Authority shows an average energy savings of 13% and reduction of emissions by as much as 50% after the control was installed.

In this era of "green" sensibility, the Green Levittown project will become a model example which will continue to play out in the press over the next 18 months or so. The project is the brainchild of Nassau County executive Thomas Suozzi, and it has gotten national and even international attention, with the Canadian press also covering the project. Green Levittown is sponsored by eight companies who specialize in sustainability products, from energy-saving devices to home improvement to financing.

There is a community celebration with a special focus on "Green Levittown" scheduled to take place on March 8, 2008. Another major event is scheduled for Earth Day in April that will focus on the efficiencies and economies the town is realizing through its citizens. And Intellidyne, a proud partner in Green Levittown, will continue to monitor and report on the savings of the Levittown homes that have adopted this energy saving technology. About Intellidyne.

About Intellidyne

Intellidyne, LLC is the market-leading developer and manufacturer of energy savings controls for residential and commercial heating, air conditioning and refrigeration applications that immediately reduce energy consumption by at least 10%. Intellidyne, founded in 1996, is privately held and located in Glen Cove, Long Island, New York. Already installed in thousands of government, commercial and residential buildings, their patented, proprietary, microprocessor-based product line is measurably reducing energy consumption, energy costs and pollution throughout the country. Intellidyne, LLC may be found on the web at www.intellidynellc.com

About greenlevittown.com

Greenlevittown.com is a public-private initiative spearheaded by Nassau County Executive, Tom Suozzi, Citizen's Campaign for the environment and concerned corporate partners. The mission of the campaign is to make it easy for the citizens of Levittown to save money on energy costs by providing special discounts on energy efficient products and services. The goal is to make America's first suburb into America's most energy efficient suburb.
