Wantagh, NY 11793  
ATT: Jack Hammer, COO

Dear Jack:

It has been more than 2 years since the installation of the Intellidyne refrigeration system electrical economizers and I could not be more pleased with their performance.

As Director of Operations, I have personally reviewed the technical consumption report provided by Con Edison and have found the results to be representative of our operation.

I was greatly impressed as the installation of all sixty (60) Intellidyne economizer units in our stores was completed quickly and had no impact on day-to-day operations. Your economizers gave us a 100% return on our investment in their first 9-months of operation and we are thrilled that these savings on our electric bills will continue to accrue for years to come.

Our entire experience with your company and associated products has been very satisfying professionally as well as financially and I look forward to the release of any future energy-saving products you have to offer.

Thanks again,

A handwritten signature in black ink, appearing to read "Philip A. Ferrante".
